

School Exchange Partnerships : France, Spain, Italy and Greece

All the activities of the project have the main topic : To protect and preserve the environment and all the natural resources becoming aware of the possible disasters caused by climate change over the years. The activities students will have to do throughout the duration of the project aim to make each of them responsible for taking “sustainable and green” actions to save our planet.

Activity 1. Logo challenge for the project which involved Italian – French and Spanish students; Italian students made videos to introduce themselves and the region (towns, landscapes and territory to the partners.) . Logos and videos are posted on **MYetwinning space- Materials**

Activity 2. (December) online meeting (Italy- France ; Italy - Spain) : students met through the platform GMeet to introduce themselves and talk about their own region (natural features and beauties, attractions).

Activity 3. (February and March) – n. 2 online meeting (Italy- France) –Italian students made a presentation on PPT with slides on Water for the international event WWD- (meaning of WWD- the importance of save water as precious resource for our lives – water in the world : countries at risk of draught. The PPT is posted on **MYetwinning space- Materials**

Activity 4. (May) – online meeting (Italy- Spain) - Italian students created a Water Survey of 15 items with Google Form. So far, the survey has been submitted only to the Spanish students --- On that occasion, Italian and Spanish students commented on the results of the questionnaire- The survey is posted on **MYetwinning space- Materials** .

Teachers online meetings : October 2020; January 2021 and May 2021

Riposto, 1 July 2021

The Italian referent teacher of the project

Mirella Lizzio
